Choose a movie from the supplemental materials list. View the movie and answer the attached questions. You will probably need to view the movie two to three times to accurately complete this project.

**Name of movie:**
**Name of movie patient you are assessing:**

**What is the chief complaint?** (Why, in his/her “own words”, would the client say he/she is being assessed?)

**Based on the above information and a close viewing of the movie, what questions would you raise during history taking?**
   - History of your client’s present (and presenting) illness
   - Past psychiatric history, its treatment, and treatment outcomes
   - Psychosocial history
   - Past significant medical history

**What are some possible answers?**

**What observations do you have about your client’s behavior?**

**Complete a 5 axis diagnostic criteria for your client.**

**What DSM-IV-TR criteria support this diagnosis?**

**Could the client have any other psychiatric disorder? If so, list and include supporting diagnostic criteria.**

**What treatment plan would you outline for this client?** *Be thorough.*

**What are your ST and LT goals for this client?**

**What is your impression of the accurateness of the portrayal of the client’s diagnosis in the movie? What could have been done different to more accurately portray a client with that diagnosis?** If you watch Beautiful Mind, what do you observe that indicates John is hallucinating? (Give specific examples)

Course Number & Title  NURS3270: Psychosocial Aspects of Client Care
Term/Academic Year  Spring 2008
Contact Information  Jeana Wilcox PhD, RN, CNS
                    E-mail address jwilcox@graceland.edu

COURSE DESCRIPTION

The course will include the promotion of healthy individual and family system
responses to psychosocial stressors (violence, poverty, substance abuse, illness, etc.).
Psychopathology will be explored with opportunities to practice primary, secondary, and
tertiary nursing interventions in the clinical setting.
